Equator Principles cannot be successfully applied without a full understanding of the environmental assessment process.

Everyone can (and if involved in project financing should) read the Equator Principles (www.equator-principles.com) and the closely related IFC Environmental and Social Performance Standards (PS) and the sector-specific IFC Environmental, Health, and Safety (EHS) Guidelines (www.ifc.org). However the Equator Principles cannot be successfully applied without a full understanding of the environmental assessment process based on years of practical experience in diverse projects and jurisdictions.

greencorp's senior consultants offer a long track-record working with financial institutions, either to act as Lenders' Environmental and Social Consultant (LESC) or to assist Owners in developing and documenting the environmental assessment and the management system that conform to Good International Industry Practice in form of IFC PS. Project examples below.

PROJECTS

BP Tangguh LNG Trains 3 and 4

Donggi Senoro LNG

TWU Mini Oil Refinery

Darajat Geothermal Unit 2

Martabe Gold Mine
