

# greencorp ESG

There is an emerging need from regulators and stakeholders for companies to disclose Environmental, Social and Governance (ESG) information.

Pressure from investors, employees, customers, non-governmental organizations (NGOs) and other stakeholders to increase transparency on sustainable and socially responsible practices continues to rise. Environmental, Social and Governance (ESG) analysis and reporting helps you demonstrate long term value to your stakeholders, improve your financial metrics, and better inform your investment decisions. For publicly listed companies, such reports are also a mandatory requirement.

The Greencorp ESG team draws on quantitative and qualitative data to help you communicate your company's commitment towards environmental stewardship, operational relationships and good business ethics, and maintain access to capital markets.
