

greencorpsafety

“If people are good only because they fear punishment, and hope for reward, then we are a sorry lot indeed.”

– Albert Einstein

The behaviour of operational leaders creates an organisations safety culture. This powerful leadership influence often plays out randomly, with leaders sometimes baffled by the unintended outcomes of their approach to safety. Harnessed effectively, this same influence can be wielded to affect real change. Greencorp’s safety coaching program is a powerful tool to help leaders unleash their full potential in effecting transformational change in safety performance.

Our clients have effective safety systems but incidents still happen, sometimes with tragic consequences. This is an indication that more can be done. A Safety Coaching Program helps you connect your people more effectively around safety and breathe new life into existing systems and procedures.

Safety Coaching Projects

Keppel Offshore and Marine – Building Safety Coaching Capacity
